

Roll Out Rafter Tray

Installation

The Roll Out Trays are rolled out over the rafters in the correct position to provide a clear ventilation channel above the roof insulation and fixed into the rafters using corrosion resistant clout head nails or staples. For low pitch pitched roofs two trays may be joined together and if using soffit ventilation the bottom edge of the tray must be kept minimum 25mm from the back of the fascia board.

Roll Out Rafter trays are a simple but effective way of preventing loft insulation from being pushed up to the underside of the roofing underlay and will maintain a clear ventilation path into the roof void from the eaves. The rafter trays will be suitable for 10,000 mm²/m or 25,000 mm²/m continuous eaves ventilation.

Product features & benefits

- Quick and easy to install
- Lightweight and durable

Area of application

Suitable for:

- 300-600mm rafter centres
- New build and re-roofing applications
- 10,000 mm²/m or 25,000 mm²/m continuous eaves ventilation
- Roof pitches over 12.5°
- Available in four widths

Material

Black PVC

Product Codes / Dimensions / Weight (per carton)

KP971500	6m x 300mm x 55mm	8.4kg
KP975700	6m x 400mm x 55mm	7.4kg
KP971600	6m x 600mm x 55mm	12.8kg
KP971700	6m x 800mm x 55mm	18.2kg

Packaging

10 rolls per carton
